Objective:

INTERNSHIP | JUNIOR SOFTWARE ENGINEER
Software Engineering student and freelance developer seeking opportunities in Tech to apply and expand my expertise in full-stack web development, data analysis, and process automation.

Technical Skills:

Frontend: React | TypeScript | JavaScript | Three.js | Tailwind CSS | GSAP | HTML | CSS | Vite

Backend: Node.js | Python | FastAPI | Django | PostgreSQL | SQL | NoSQL | Docker | AWS (Basic)

AI & Data: RAG (Retrieval-Augmented Generation) | Vector Databases (Qdrant, pgvector, Weaviate, FAISS) | Embeddings | Document Chunking | Semantic Search | AI-Assisted TDD

Tools & Automation: Git | GitHub | Power BI | Power Apps | Power Automate | Excel

Competencies: TDD (Test-Driven Development) | OOP | Process Automation | UI/UX | Design Patterns | Agile Methodologies | RESTful Architecture

Languages:

English: Advanced (C1) | Portuguese: Native

Education:

Leonardo da Vinci University Center (UNIASSELVI)
Bachelor's in Software Engineering - 4th semester 2025 - 2028

Professional Experience:

Software Engineering Intern - CMOC Mar 2025 - Present

Proactively identified and implemented technological solutions for the PPCM (Maintenance Planning & Control) team, automating operational workflows that were previously manual:

- Engineered from scratch the enterprise system 'Management of Schedules and Adherence' using Power Apps and Power Automate.
- Automated team control routines and reporting using Python, Power Automate, and Excel/VBA.
- Created strategic Capex and budget dashboards in Power BI utilizing DAX and Power Query.
- Automated cost center spreadsheet synchronization across multiple company departments.

Young Apprentice - EquinoxGold 2024 - 2025

First corporate experience in the mining sector, developing discipline, accountability, and strong teamwork foundations:

- Supported administrative and operational routines, gaining visibility into industrial processes.
- Participated in practical initiatives that reinforced professional communication and organizational skills.

Practical Projects:

Barbershop Booking System (atualestilo.com) - Developed an end-to-end appointment web application utilizing HTML, CSS, and JavaScript. The system drove a **46% growth in customer volume** and handles **over 30 daily bookings**, automating schedule management and **drastically reducing manual workload** for the team.

Architecture Portfolio & Lead Management (portifolio-milena.vercel.app) - Created a professional web portfolio integrated with automated tracking that organizes and manages client leads generated through the site, streamlining customer acquisition and client follow-ups.

Interactive 3D Personal Portfolio (schaide-nunesdev.vercel.app) - Modern web application built with React, TypeScript, Three.js, and Tailwind CSS, featuring a 3D cosmic theme, interactive parallax effects, and high-performance fluid animations.
